-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

Claim Objections

Claims 5, 6, 10 and 14 are objected to because of the following informalities: regarding claims 5, 6, they should be depend on at least claim 3 because "said rear panel" and "said front panel" both have no antecedent to claim 1. Regarding claim 10, it should be depended on 9 for consistency and further it is mirrored claim 2. Regarding 14, it should be depended on claim 10 because "said protective cap" has no antecedent to claim 9. For the sake of examination, the Examiner assumes claims as reasoned. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tung et al. (US 6,528,969). The reference discloses a portable charger 2 for a mobile phone 1

having, *inter alia*, a housing 23 to house a battery 22, a receptacle 25 to receive a power cord adapter 3 for charging the phone. See figure 2.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shy (US 6,215,273) in view of Tung et al. (US 6,528,969) and further in view of You et al. (US 6,501,246). The reference of Shy discloses a portable power supply 10 having, *inter alia*, one chamber 121 to house a power battery unit 50, a second chamber 44 to house the power cord adapter 45. See figures 2 and 3.

It is however not use to charge a mobile phone. Tung discloses a similar device but is sized to charge a mobile phone. It would have been obvious to modify the references so that the cord of Tung can be retracted into the device similar to Shy's for the purpose of compactness and design so it can prevent the user from losing the cord.

Regarding claims 2 and 14, the reference of You disclose a cap 30 for protecting the receptacle when it is not in use. It would have been obvious to use a protective cap in order to prevent foreign matter from clogging up the terminal.

Conclusion
